The power of WEBPOINT 2.1

Hybrid
control and configure InFusion and QSystems within the same interface.

Cameras
view IP and analog cameras live and view archived motion captured video clips.

Lighting
control all of your lights, blinds and other devices within the same interface.

Keypads
control your system with onscreen virtual keypads.

Calendar
schedule events and easily choose the days, weeks, or months on which they occur.

Time Controls
easily enable timed events and schedule their execution.

Multiple Users
create multiple users with restricted access if desired.

Macros
create macros that can be scheduled and played back at any time.

Overview
View and control all of your lights and devices in one easy to use screen with live feedback

- PEACE OF MIND FOR THE HOMEOWNER AS FOR THE INSTALLER -

WebPoint 2.1 provides significant flexibility to the homeowner, without compromising the original programming. Permanent changes to the program would still be a service that would be provided by the custom installer.

Find out more installation information on the product section of our website **www.vantage-emea.com**
