

TPT1210-1 PEDESTAL MOUNTING DOCK

User Interfaces

The Pedestal Mounting Dock provides a simple and convenient way to place the TPT1210-1 on a coffee table, countertop or any flat surface. Designed to easily dock and undock, the pedestal powers the web tablet while it is in the cradle. When docked, the ports on the TPT1210-1-PED are passed through to the TPT1210-1 including power.

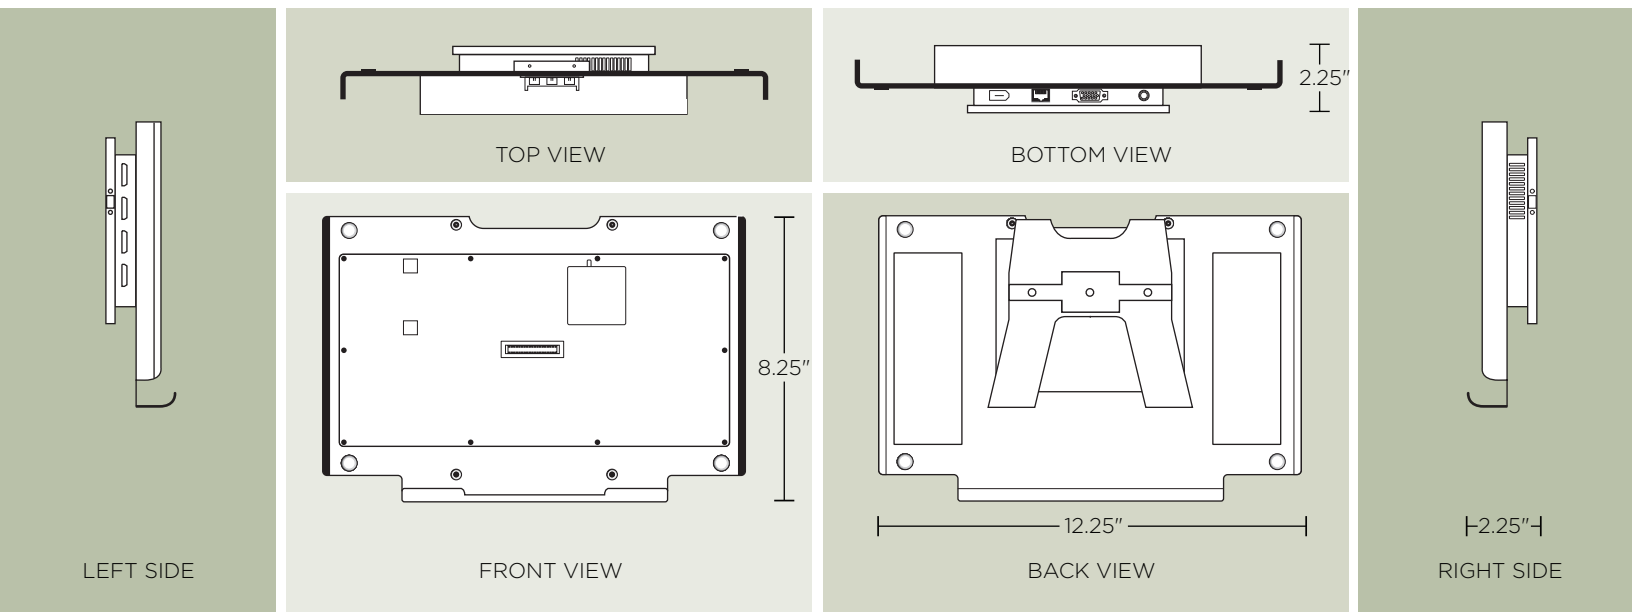

The dock's multiple position legs allow different tilt angles for the most comfortable viewing perspective. The mounting legs are also removable which allows the dock to be connected to any VESA mount device using 100mm or 75mm VESA mounting solutions. If using the VESA mount solution you must also order the optional Quick-Release Lock. Expand the usability of the TPT1210-1 today with the Pedestal Mounting Dock.

Product Highlights

- Multiple positioning stand legs for custom viewing angles
- 100mm or 75mm VESA mount solution
- Desktop workstation to mobile companion
- Provides convenient placement of the TPT1210-1 wherever the homeowner desires it.
