## JUMP FORWARD IN AUDIO INTEGRATION WITH VANTAGE'S LATEST INNOVATION: THE DIGITAL MUSIC MANAGER

The most stable, robust, user-friendly digital music manager on the market, the DMM, automatically seeks out all of the digital music in a home's network and enables the homeowner to play and control it easily from any Vantage interface.

No more struggling with multiple formats, multiple sources, multiple remotes, varying levels of quality and the ability to play only one stream at a time.

The DMM delivers audio from up to four independent audio streams to the Vantage Axiom 450 Series Multi-Room Amplifier or any other multi-room system, meaning a homeowner can enjoy their favorite Internet radio station in the kitchen, while their son streams live from his laptop upstairs, their spouse enjoys '80s music in the exercise room and a house guest listens to their iPod in the living room. What's more, the guest's iPod metadata will populate to the Digital Music Manager when plugged in, and stream live music from the iPod. When the iPod is removed, so too is the metadata content, restoring the system to its original state.

### FEATURES

- 500 GB Storage
- Error-free ripping
- Aggregation of Audio Control
- USB/MP3 Support
- Internet Radio
- Four dual-capable outputs
- Control UI
- NAS/Ripping

### BENEFITS

- ▶ Preserve and protect the value of your music collection
- ▶ Rip your own CDs at bit-perfect quality
- ▶ Play music whether on-board or on the network
- ▶ Plug in your friend's iPod and listen together
- ▶ Your local radio station from anywhere in the world
- ▶ More listening options with fewer sources
- ▶ Manage and control independent streams separately
- ▶ Play or Rip content to NAS
